

【2020 年】某高校学生使用手机阅读目的

某高校学生使用手机阅读目的

学习知识 59.5%
消磨时间 21.3%
获取信息 17.0%
其他 2.2%

英语二 2020 年 某高校学生使用手机阅读目的 (英文)

As is clearly indicated in the chart, students at a certain university use their mobile phones for quite different purposes. According to the given statistics, 59.5 of their time is spent on learning knowledge. In contrast, the proportions of killing time and inquiring information account for 21.3% and 17.0% respectively, ranking the second and third place.

So, what might be the reason for such a phenomenon? From my perspective, at least two fundamental factors should be taken into consideration. First and foremost, compared with their parents, today's college students are attaching more importance to their career development. Therefore, it is not surprising that they would choose learning as their primary concern when they use their phones. Second, some students choose to kill time and inquire information because mobile phones provides us with an abundance of information and entertainment to meet our multiple needs.

Personally, I believe what the chart indicates will remain unchanged in the next several years. However, schools should provide them with more lectures so that they can have a more comprehensive knowledge of how to use their phone properly. It is my sincerely hope that every college students can make full use of their phones. (200 words)

中国某大学毕业后去向变化 (中文)

如图表所示，某所大学的学生使用他们的手机（出于各种不同的目的）。根据所给的数据，他们 59.5%的

时间用于学习知识。相比之下，消磨时间和查询信息的比例分别为 21.3%和 17.0%，居第二和第三位。

那么，是什么原因造成了这种现象呢？从我的角度来看，至少应该考虑两个重要的因素。首先，和他们的父母相比，现在的大学生更加重视他们的职业发展。因此，毫不奇怪，当他们使用手机时，他们选择学习作为他们的首要考虑。其次，一些学生选择消磨时间和查询信息是因为手机为我们提供了丰富的信息和娱乐，以满足我们的多种需求。

就我个人而言，我相信图表所反映的现象在未来几年将保持不变。然而，学校应该为他们提供更多的讲座，以便他们能够更全面地了解如何正确使用手机。我衷心希望每个大学生都能充分利用他们的手机。
